Contents Parts A and B vii

PART A

Part I: Amorphous and microcrystalline silicon, germanium and carbon

The Mott Lecture

Spin-dependent processes in amorphous and microcrystalline silicon: a survey (Invited paper)
M. Stutzmann, M.S. Brandt and M.W. Bayerl 1

Section 1. Growth of amorphous and microcrystalline silicon

Surface reactions in very low temperature (<150°C) hydrogenated amorphous silicon deposition, and applications to thin film transistors (Invited paper)
G.N. Parsons 23

Plasma enhanced chemical vapor deposition of amorphous, polymorphous and microcrystalline silicon films (Invited paper)
P. Roca i Cabarrocas 31

Structural study of initial layer for μc-Si:H growth using real time in situ spectroscopic ellipsometry and infrared spectroscopy
H. Fujiwara, Y. Toyoshima, M. Kondo and A. Matsuda. 38

Evolutionary phase diagrams for the deposition of silicon films from hydrogen-diluted silane
J. Koh, A.S. Ferlauto, P.I. Rovira, R.J. Koval, C.R. Wronski and R.W. Collins 43

In situ investigation of polymorphous silicon deposition
A. Fontcuberta i Morral, R. Brenot, E.A.G. Hamers, R. Vanderhaghen and P. Roca i Cabarrocas 48

Infrared attenuated-total-reflection spectroscopy of microcrystalline silicon growth
Y. Okazaki, S. Miyazaki and M. Hirose. 54

Surface-sensitive Raman scattering study on a-Si:H network formation process during deposition and H_2 plasma annealing
S. Miyazaki, N. Fukuhara and M. Hirose 59

In situ observation of low temperature growth of crystalline silicon using reflection high-energy electron diffraction
T. Kitagawa, M. Kondo and A. Matsuda. 64

Nucleation and growth analysis of microcrystalline silicon by scanning probe microscopy: substrate dependence, local structural and electronic properties of as-grown surfaces
Ch. Ross, J. Herion and H. Wagner 69

Experimental evidence for an inhomogeneous surface dangling bond limited growth mechanism in a-Si:H
A.J. Flewitt, J. Robertson and W.I. Milne 74

Growth mechanism of hydrogenated amorphous silicon
J. Robertson 79

High rate growth of microcrystalline silicon at low temperatures
M. Kondo, M. Fukawa, L. Guo and A. Matsuda 84

Guiding principles for obtaining stabilized amorphous silicon at larger growth rates
M. Takai, T. Nishimoto, T. Takagi, M. Kondo and A. Matsuda 90

Investigation of growth mechanisms of microcrystalline silicon in the very high frequency range
R. Terasa, M. Albert, H. Grüger, A. Haiduk and A. Kottwitz 95

Transport mechanism of deposition precursors in catalytic chemical vapor deposition studied using a reactor tube
N. Honda, A. Masuda and H. Matsumura 100

Comparison of gas-phase reactions in low-temperature growth of Si films by photochemical vapor deposition and the hot wire cell method
K. Abe, T. Tsushima, M. Ichikawa, A. Yamada and M. Konagai 105

Low substrate temperature deposition of amorphous and microcrystalline silicon films on plastic substrates by hot-wire chemical vapor deposition
P. Alpuim, V. Chu and J.P. Conde 110

Some indications of different film forming radicals in a-Si:H deposition by the glow discharge and thermocatalytic CVD processes
B. Schröder and S. Bauer 115

Structural properties of polycrystalline silicon films having varied textures fabricated with intentional control of surface reactions using $SiF_4/H_2/SiH_4$ mixing gas
T. Kamiya, K. Nakahata, C.M. Fortmann and I. Shimizu 120

Microstructure and surface roughness of microcrystalline silicon prepared by very high frequency-glow discharge using hydrogen dilution
E. Vallat-Sauvain, U. Kroll, J. Meier, N. Wyrsch and A. Shah 125

Growth kinetics of nanocrystalline silicon from SiH_2Cl_2 by plasma-enhanced chemical vapor deposition
H. Shirai, C. Fukai, Y. Sakuma and Y. Moriya 131

Novel deposition technique of Er-doped a-Si:H combining catalytic chemical vapor deposition and pulsed laser-ablation
A. Masuda, J. Sakai, H. Akiyama, O. Eryu, K. Nakashima and H. Matsumura 136

High quality unhydrogenated low-pressure chemical vapor deposited polycrystalline silicon
R. Rogel, M. Sarret, T. Mohammed-Brahim, O. Bonnaud and J.P. Kleider 141

Post hydrogenation of sputtered amorphous silicon by pressurized water boiling
N. Sakamoto and Y. Ohmura 146

Section 2. Structural properties

Schläfli cluster topological analysis of medium range order in paracrystalline amorphous semiconductor models
M.M.J. Treacy, P.M. Voyles and J.M. Gibson 150

Computer simulation of low-energy excitations in amorphous silicon with voids
S.M. Nakhmanson and D.A. Drabold 156

Softening of elastic moduli of amorphous semiconductors
C. Mathioudakis and P.C. Kelires 161
The splitting of absorption bands in IR spectra of anisotropic SiH monolayers covering the internal surfaces in μc-Si:H
D. Stryahilev, F. Diehl and B. Schröder 166
Structural study of p-type μc-Si layer for solar cell application
T. Sasaki, S. Fujikake, K. Tabuchi, T. Yoshida, T. Hama, H. Sakai and Y. Ichikawa 171

Section 3. Hydrogen in amorphous and microcrystalline silicon

Isotopic effect between hydrogen and deuterium emission in silicon
R. Biswas, Y.-P. Li and B.C. Pan 176
Ultrafast infrared experiments on Si–H vibrations in a-Si:H
M. Van der Voort, C.W. Rella, A.F.G. van der Meer, A.V. Akimov and J.I. Dijkhuis 180
Microstructure and dynamics of hydrogen in a-Si:H detected by nuclear magnetic resonance
J. Baugh, D. Han, A. Kleinhammes, C. Liu, Y. Wu and Q. Wang 185
Hydrogen at compact sites in hot-wire chemical vapour deposited polycrystalline silicon films
J.K. Rath, R.E.I. Schropp and W. Beyer 190
Molecular hydrogen in amorphous silicon revisited
T. Su, P.C. Taylor, S. Chen, R.S. Crandall and A.H. Mahan 195
Characterization and role of hydrogen in nc-Si:H
T. Itoh, K. Yamamoto, K. Ushikoshi, S. Nonomura and S. Nitta 201
Comparative study of hydrogen stability in hydrogenated amorphous and crystalline silicon
W. Beyer and U. Zastrow 206

Section 4. Electronic structure

Anderson transition and thermal effects on electron states in amorphous silicon (Invited paper)
D.A. Drabold 211
A molecular dynamics study of the structure of band tails in a-Si:H
P.A. Fedders 218
Percolation-controlled electronic properties in microcrystalline silicon: effective medium approach
K. Shimakawa 223
Charge modulation spectra in phosphorus-doped a-Si:H
J. Lyou, N. Kopidakis and E.A. Schiff 227
Generation–recombination noise studied in hydrogenated amorphous silicon
P.A.W.E. Verleg and J.I. Dijkhuis 232
Noise-detected magnetic resonance experiments in amorphous hydrogenated silicon
S.T.B. Goennenwein, M.W. Bayerl, M.S. Brandt and M. Stutzmann 237
$1/f$ Noise in doped and undoped amorphous silicon
R.E. Johanson, M. Güneş and S.O. Kasap 242
Space charges resulting from photocurrents exceeding the thermionic emission currents in a-Si:H
E. Spanakis, E. Stratakis, N. Kopidakis, P. Tzanetakis and H. Fritzsche 247
Structural and electronic properties of optimized a-Si:H films
Y. Lubianiker, J.D. Cohen, G. Lubarsky, Y. Rosenwaks, J. Yang and S. Guha 253
Electronic properties of silicon thin films prepared by hot-wire chemical vapour deposition
R. Brüggemann, J.P. Kleider, C. Longeaud, D. Mencaraglia, J. Guillet, J.E. Bourée and C. Niikura 258
Structural, optical and electronic properties of hydrogenated polymorphous silicon films deposited at 150°C
R. Butté, S. Vignoli, M. Meaudre, R. Meaudre, O. Marty, L. Saviot and P. Roca i Cabarrocas 263

Section 5. Optical properties

Modeling the dielectric functions of silicon-based films in the amorphous, nanocrystalline and microcrystalline regimes
A.S. Ferlauto, J. Koh, P.I. Rovira, C.R. Wronski, R.W. Collins and G. Ganguly 269
Optical and electronic properties of microcrystalline silicon deposited by hot-wire chemical vapor deposition
D. Han, H. Habuchi, T. Hori, A. Nishibe, T. Namioka, J. Lin and G. Yue 274
Optics of textured amorphous silicon surfaces
P.I. Rovira, A.S. Ferlauto, J. Koh, C.R Wronski and R.W. Collins 279
Light trapping by formation of nanometer diameter wire-like structures on μc-Si thin films
J. Rappich, S. Lust, I. Sieber, W. Henrion, J.K. Dohrmann and W. Fuhs 284
New results on the modulated photocarrier grating technique
E. Morgado, J. Díez, R. Schwarz, A. Maçarico and S. Koynov 290

Section 6. Electron transport

The effect of spatial disorder on the mobility of charge carriers hopping through energetically disordered dipolar lattices
D.M. Goldie 294
Dispersive transient current due to hopping at band edge fluctuating with self-affine fractal dimension
K. Murayama and R. Ikeuchi 299
Conductance fluctuations in undoped intrinsic hydrogenated amorphous silicon films prepared using several deposition techniques
M. Güneş, R.E. Johanson and S.O. Kasap 304
Local electronic transport in microcrystalline silicon observed by combined atomic force microscopy
A. Fejfar, B. Rezek, P. Knápek, J. Stuchlík and J. Kočka 309
Local photoconductivity correlation with granular structure of microcrystalline silicon thin films
B. Rezek, C.E. Nebel and M. Stutzmann 315
Electronic transport in hydrogenated microcrystalline silicon: similarities with amorphous silicon
C. Droz, M. Goerlitzer, N. Wyrsch and A. Shah 319
Anisotropy in the transport of microcrystalline silicon
T. Unold, R. Brüggemann, J.P. Kleider and C. Longeaud 325
New method of drift mobility evaluation in μc-Si:H, basic idea and comparison with time-of-flight
G. Juška, K. Genevičius, M. Viliunas, K. Arlauskas, H. Stuchlíková, A. Fejfar and J. Kočka. . 331
Measurement of transversal ambipolar diffusion coefficient in microcrystalline silicon
R. Brenot, R. Vanderhaghen, B. Drévillon and P. Roca i Cabarrocas 336
Anisotropic carrier transport in preferentially oriented polycrystalline silicon films fabricated by very-high-frequency plasma enhanced chemical vapor deposition using fluorinated source gas
K. Nakahata, T. Kamiya, C.M. Fortmann, I. Shimizu, H. Stuchlíková, A. Fejfar and J. Kočka 341
The change of transport mechanism in μc-Si:H films induced by H_2-diluted silane plasma
S. Huang, L. Wang, G. Ganguly, J. Xu, X. Huang, A. Matsuda and K. Chen 347
Frequency-resolved drift mobility in a-Si:H
K. Hattori, T. Hirao, M. Iida and H. Okamoto 352
Transient thermal gratings and carrier-induced gratings in diffusion experiments
M. Niehus, S. Koynov, T. Múrias and R. Schwarz 357
Interpreting transient photocurrents as a signature of the density of states distribution: the profound importance of the short-time decay
S. Grabtchak, C. Main and S. Reynolds 362

Improvement of energy resolution of transient photoconductivity analysis for measuring localized-state distributions in amorphous semiconductors
N. Ogawa, T. Nagase and H. Naito 367
Recombination kinetics of long-lived carriers in a-Si:H at low temperatures
N. Schultz, B. Yan, A. Efros and P.C. Taylor 372
Numerical simulation of low-field thermally stimulated conductivity in a-Si:H
T. Smaïl, M. Aoucher and T. Mohammed-Brahim 376
High hole drift mobility in a-Si:H deposited at high growth rates for solar cell application
B.A. Korevaar, G.J. Adriaenssens, A.H.M. Smets, W.M.M. Kessels, H.-Z. Song, M.C.M. van de Sanden and D.C. Schram 380
Comparative study of microcrystalline silicon films prepared in low or high pressure regime by hot-wire chemical vapor deposition
C. Niikura, J. Guillet, R. Brenot, B. Equer, J.E. Bourée, C. Voz, D. Peiro, J.M. Asensi, J. Bertomeu and J. Andreu 385

Section 7. Light-induced metastability and expansion

The hydrogen collision model: theory and experiment (Invited paper)
H.M. Branz 391
Long-range disorder and metastability in amorphous silicon
D. Quicker, P.W. West and J. Kakalios 397
Metastability in amorphous silicon from hydrogen flips
R. Biswas and Y.-P. Li 401
A study of light-induced degradation of a-Si:H by nanosecond laser pulse pairs of variable delay
P. Stradins, M. Kondo and A. Matsuda 405
Model of the light-induced creation of two types of dangling bonds in a-Si:H
K. Morigaki and H. Hikita 410
Hydrogen-mediated models for metastability in a-Si:H: role of dihydride bonding
N. Kopidakis and E.A. Schiff 415
Kinetics of defects and electron, hole diffusion lengths during light soaking and consequent annealing
A.S. Abramov, A.I. Kosarev and P. Roca i Cabarrocas 419
Charge-trapping metastability in doped hydrogenated amorphous silicon
R.S. Crandall 423
Effect of hole accumulation on photodegradation in a-Si:H
K. Imagawa, K. Shimakawa and A. Kondo 428
Generation and annealing kinetics of current induced metastable defects in amorphous silicon alloys
S.P. Lau and J.M. Shannon 432
Electron beam creation of metastable defects in hydrogenated amorphous silicon: hydrogen collision model
A. Yelon, H. Fritzsche and H.M. Branz 437
Persistent excited conductivity and the threshold fluence in a-Si:H under 17 MeV proton irradiation
H. Amekura, N. Kishimoto, K. Kono and A. Kondo 444
Amorphous silicon deposited at high growth rates near the onset of microcrystallinity
Y. Lubianiker, Y. Tan, J.D. Cohen and G. Ganguly 450
Hindering the light-induced instability in a-Si:H by hydrogen clusters
J.-H. Yoon 455
Effect of amorphous silicon material properties on the stability of thin film transistors: evidence for a local defect creation model
R.B. Wehrspohn, S.C. Deane, I.D. French and M.J. Powell 459

Metastability of hot-wire amorphous-silicon thin-film transistors
B. Stannowski, A.M. Brockhoff, A. Nascetti and R.E.I. Schropp 464
Influence of variation of lithium concentration on metastabilities in a-Si:H(Li)
P. Agarwal and S.C. Agarwal 469
The light-induced metastable lattice expansion in hydrogenated amorphous silicon (Invited paper)
S. Nonomura, N. Yoshida, T. Gotoh, T. Sakamoto, M. Kondo, A. Matsuda and S. Nitta 474
A study on the correlation between the photoinduced volume expansion and the internal stress in hydrogenated amorphous silicon
T. Sakamoto, N. Yoshida, H. Harada, T. Kishida, S. Nonomura, T. Gotoh, M. Kondo, A. Matsuda, T. Itoh and S. Nitta 481
Photoinduced structural change and restoration of hydrogenated amorphous silicon
K. Shimizu 486
Light-induced, reversible, above-gap, optical changes in hydrogenated amorphous silicon films
N. Hata, P. Stradins, C.M. Fortmann, H. Fujiwara, M. Kondo and A. Matsuda 491
The effect of light soaking on the structural order in a-Si:H
S. Gupta, R.S. Katiyar, S.Z. Weisz and I. Balberg 496
Low temperature internal friction study of light-induced structural instability in hydrogenated amorphous silicon
X. Liu, C.L. Spiel, R.O. Pohl, E. Iwaniczko and R.S. Crandall 501
Stress and internal friction associated with light-induced structural changes of a-Si:H deposited on crystalline silicon microcantilevers
E. Stratakis, E. Spanakis, H. Fritzsche and P. Tzanetakis 506

Section 8. Defects, dopants and impurities

Electronic properties of microcrystalline silicon investigated by electron spin resonance and transport measurements (Invited paper)
F. Finger, J. Müller, C. Malten, R. Carius and H. Wagner 511
Electron spin resonance and optical characterization of defects in microcrystalline silicon
M. Vaněček, A. Poruba, Z. Remeš, J. Rosa, S. Kamba, V. Vorlíček, J. Meier and A. Shah ... 519
Identification of non-radiative recombination paths in microcrystalline silicon (μc-Si:H)
P. Kanschat, K. Lips and W. Fuhs 524
Creation and annihilation mechanism of dangling bonds within the a-Si:H growth surface studied by in situ ESR technique
S. Yamasaki, U.K. Das, T. Umeda, J. Isoya and K. Tanaka 529
Standard and electrically detected magnetic resonance in nanocrystalline silicon
W. Bronner, R. Brüggemann and M. Mehring 534
Multi-band electron paramagnetic resonance study of the defects in microcrystalline silicon
T. Ehara, T. Ikoma and S. Tero-Kubota 540
Microscopic structure of defects in microcrystalline silicon
M. Kondo, S. Yamasaki and A. Matsuda 544
Clustered defects in hot wire chemical vapor deposited poly-silicon films
J.K. Rath, A. Barbon and R.E.I. Schropp 548
Defect re-distribution in amorphous silicon below equilibration temperature
R.A.C.M.M. van Swaaij, V. Nádazdy, M. Zeman, E. Pincik and J.W. Metselaar 553
Spatial distribution of dangling bonds in undoped hydrogenated amorphous silicon observed by solid-state voltcoulometry
V. Nádazdy, R. Durny, E. Pincik, I. Thurzo, M. Kumeda and T. Shimizu 558

On the relation between defect density and dopant concentration in amorphous silicon films
D. Caputo, G. de Cesare, F. Irrera, A. Nascetti and F. Palma 565
Mid-gap states measurements of low-level boron-doped a-Si:H films
J. Theil, D. Lefforge, G. Kooi, M. Cao and G.W. Ray 569

Section 9. Luminescence and erbium doping

Lifetime distribution of PL under pulsed excitation in hydrogenated amorphous silicon based films
C. Ogihara, H. Takemura, H. Yoshida and K. Morigaki 574
Selective dominance of photoluminescence lifetime in a-Si:H-based alloys
H. Oheda 578
Light emitting wide band gap a-Si:H deposited by microwave electron cyclotron resonance plasma-enhanced chemical vapour deposition
K. Luterová, P. Fojtík, A. Poruba, J. Dian, J. Valenta, H. Stuchlíková, J. Štěpánek, J. Kočka and I. Pelant 583
Optical absorption and luminescence properties of wide-band gap amorphous silicon based alloys
F. Giorgis, P. Mandracci, L. Dal Negro, C. Mazzoleni and L. Pavesi 588
Fundamental gap of luminescent nanocrystalline silicon thin film
T. Toyama, Y. Kotani, A. Shimode and H. Okamoto 593
Evolution of the Er environment in a-Si:H under annealing: ion implantation versus co-deposition
L.R. Tessler, C. Piamonteze, M.C. Martins Alves and H. Tolentino 598
Optimization of the as-deposited 1.54 μm photoluminescence intensity in a-SiO_x : H⟨Er⟩
L.R. Tessler and A.C. Iñiguez 603
Room temperature luminescence of Er doped nc-Si/SiO_2 superlattices
M. Zacharias, S. Richter, P. Fischer, M. Schmidt and E. Wendler 608
Erbium incorporation in plasma-deposited amorphous silicon
E.I. Terukov, O.I. Konkov, V.Kh. Kudoyarova, K.V. Koughia, G. Weiser, H. Kühne, J.P. Kleider, C. Longeaud and R. Brüggemann 614

Section 10. Annealing and crystallization: chemical, thermal, laser

Mechanism of low-temperature crystallization of amorphous silicon by atomic hydrogen anneal
A. Heya, A. Masuda and H. Matsumura 619
Very high frequency hydrogen plasma treatment of growing surfaces: a study of the p-type amorphous to microcrystalline silicon transition
C. Summonte, R. Rizzoli, A. Desalvo, F. Zignani, E. Centurioni, R. Pinghini and M. Gemmi . 624
The structure of 1.5–2.0 eV band gap amorphous silicon films prepared by chemical annealing
W. Futako, T. Kamiya, C.M. Fortmann and I. Shimizu 630
Changes of hydrogen evolution thermodynamics induced by He and H_2 dilution in PECVD a-Si:H films: influence on thermal crystallization
P. delli Veneri, C. Privato and E. Terzini 635
Extraordinary crystallization of amorphous Si/SiO_2 superlattices
M. Zacharias, J. Bläsing, K. Hirschman, L. Tsybeskov and P.M. Fauchet. 640
Two-step laser recrystallization of poly-Si for effective control of grain boundaries
J.-H. Jeon, K.-C. Park, M.-C. Lee and M.-K. Han 645
Interference laser crystallization of microcrystalline silicon using asymmetric beam intensities
B. Rezek, C.E. Nebel and M. Stutzmann 650
In situ and ex situ diagnostics on melting and resolidification dynamics of amorphous and polycrystalline silicon thin films during excimer laser annealing
M. Hatano, S. Moon, M. Lee, K. Suzuki and C.P. Grigoropoulos 654

The role of hydrogen in the process of successive laser crystallization of hydrogenated amorphous silicon
P. Lengsfeld, N.H. Nickel and W. Fuhs 659

Author index Parts A and B xxv
Subject index Parts A and B xliv

PART B

Section 11. Alloys of amorphous and microcrystalline silicon

Defect bands in a-Si–Ge:H alloys with low Ge content
K.C. Palinginis, J.D. Cohen, J.C. Yang and S. Guha. 665

Segregation, clustering, and suppression of phase separation in amorphous silicon–germanium alloys
C. Tzoumanekas and P.C. Kelires 670

Influence of plasma chemistry on the properties of a-(Si,Ge):H alloys
V.L. Dalal, S. Haroon, Z. Zhou, T. Maxson and K. Han 675

Techniques for measuring the composition of hydrogenated amorphous silicon–germanium alloys
B.P. Nelson, Y. Xu, J.D. Webb, A. Mason, R.C. Reedy, L.M. Gedvilas and W.A. Lanford . . . 680

Growth of microcrystalline Si and (Si, Ge) on plastic substrates
K. Erickson and V.L. Dalal 685

Crystallization of amorphous silicon–germanium films deposited by low pressure chemical vapor deposition
D. Guillet, M. Sarret, L. Haji, R. Rogel and O. Bonnaud 689

Transport properties of amorphous hydrogenated silicon–carbon alloys
J.A. Schmidt, M. Hundhausen and L. Ley 694

p-Type doping in a-$Si_{1-x}C_x$:H obtained by PECVD
M.N.P. Carreño and I. Pereyra 699

PECVD a-SiC:H thin films from liquid organosilanes dependence of photoluminescence on starting material
J. Seekamp, J. Niemann and W. Bauhofer 704

Optical properties of large band gap Se- and S-doped amorphous hydrogenated silicon
R.M. Mehra, J. Baveja, L.P. Purohit, R. Kumar, A.V. Singh, P.C. Mathur and P.C. Taylor . . 708

Section 12. Amorphous germanium and its alloys

Compact hydrogenated amorphous germanium films by ion-beam sputtering deposition
D. Comedi, F. Dondeo, I. Chambouleyron, Z.L. Peng and P. Mascher. 713

Optically excited paramagnetic centers in hydrogenated amorphous germanium
F.C. Marques, M.M. de Lima Jr and P.C. Taylor. 717

Photoluminescence in high-quality a-Ge:H
S. Ishii, M. Kurihara, T. Aoki, K. Shimakawa and J. Singh. 721

Local coordination and electronic doping of column III metals in hydrogenated amorphous germanium
I. Chambouleyron, D. Comedi, G. Dalba, P. Fornasini, R. Grisenti and F. Rocca. 726

Temperature dependence of the photoconductivity of gallium-doped hydrogenated amorphous germanium films
F.T. Reis, D. Comedi and I. Chambouleyron 730

Photocreation processes for neutral dangling bonds in a-Ge-N:H compared with a-Si-N:H
M. Kumeda, M. Miura and T. Shimizu 735

Section 13. Amorphous carbon: non-alloyed

Structural models of amorphous carbon and its surfaces by tight-binding molecular dynamics
R. Haerle, A. Baldereschi and G. Galli 740
Growth of amorphous semiconductors: tight-binding molecular dynamics study
K. Kohary and S. Kugler 746
Influence of disorder on the density of π and σ states in hydrogenated amorphous carbon
V. Paret and M.-L. Thèye 750
X-ray diffraction investigation of polymer-like hydrogenated amorphous carbon films
B. Bouchet-Fabre, J. Dixmier, T. Heitz, J.E. Bourée and C. Godet 755
Stress variations near surfaces in diamond-like amorphous carbon
M. Fyta and P.C. Kelires 760
Determination of bonding in amorphous carbons by electron energy loss spectroscopy, Raman scattering and X-ray reflectivity
A.C. Ferrari, B. Kleinsorge, G. Adamopoulos, J. Robertson, W.I. Milne, V. Stolojan, L.M. Brown, A. LiBassi and B.K. Tanner 765
Novel luminescence properties of a-C:H films produced by using an organic source at various substrate temperatures
J. Xu, T. Ma, W. Li, K. Chen, J. Du and X. Huang 769
Time-resolved study of photoluminescence polarization in a-C:H films
M.N. Berberan-Santos, A. Fedorov, T. Heitz, C. Godet, J.E. Bourée and J.P. Conde. 773
Optical properties of sputtered hydrogenated amorphous carbon
B. Popescu, C. Verney, E.A. Davis, V. Paret and A. Brunet-Bruneau 778
Comparative study of the effect of thermal annealing on the hydrogen stability and the stress in a-C:H films deposited by electron cyclotron resonance glow discharge and direct current multipolar plasma methods
M. Benlahsen, B. Racine, M. Clin and K. Zellama 783
Properties and electron field emission of highly resistive and transparent polymer-like a-C:H
K. Saito, T. Itoh, Y. Katoh, N. Okada, A. Hatta, H. Inomoto, S. Nitta, S. Nonomura and A. Hiraki. 788
Photoconductivity and photoluminescence processes in amorphous carbon
A. Ilie and J. Robertson 793
Temperature dependence of electron spin resonance in fluorinated amorphous carbon films
H. Yokomichi and K. Morigaki 797
Hydrogen incorporation and its structural effect on a-C:H films deposited by magnetron sputtering
B. Popescu, A. Tagliaferro, F. De Zan and E.A. Davis 803

Section 14. Amorphous carbon alloys

Electronic and structural properties of amorphous carbon–nitrogen alloys (Invited paper)
F. Alvarez and M.C. dos Santos 808
Structural modifications of hydrogenated amorphous carbon nitride due to ultraviolet light irradiation and thermal annealing
M. Zhang, L. Pan and Y. Nakayama. 815
Photoluminescence in low defect density a-C:H and a-C:H:N
J.V. Anguita, W.T. Young, R.U. Khan, S.R.P. Silva, S. Haq, I. Sturland and A. Pritchard . . . 821
Structural stability for UV irradiation and dielectric properties of a-CN_x films
T. Itoh, M. Aono, S. Yoshida, S. Hattori, T. Katsuno, S. Nitta and S. Nonomura 825
Diffusion of ^{71}Ge in the amorphous ceramic $Si_{28}C_{36}N_{36}$
S. Matics and W.F.J. Frank 830

Section 15. Silicon–oxygen, and III–V compounds

Leakage currents and silicon dangling bonds in amorphous silicon dioxide thin films
P.M. Lenahan, J.J. Mele, R.K. Lowry and D. Woodbury 835
Thermal stability of p-type doped amorphous silicon suboxides
R. Janssen, A. Janotta and M. Stutzmann 840
Infrared absorption and hydrogen effusion of hydrogenated amorphous silicon-oxide films
W. Beyer 845
The vibrational local modes of the metastable threefold coordinated oxygen in hydrogenated amorphous silicon oxide
S.-Y. Lin 850
Infrared photoluminescence from Er-doped a-GaAsN alloys
A.R. Zanatta 854

Part II. Chalcogenide and organic semiconductors

Section 16. Growth and structural properties

Self-organization in network glasses
M.F. Thorpe, D.J. Jacobs, M.V. Chubynsky and J.C. Phillips 859
Glass formation in the Ge–Se–AgI ternary
V. Boev, M. Mitkova, E. Lefterova, T. Wagner, S. Kasap and M. Vlček 867
Raman-spectroscopy studies on rigidity percolation and fragility in Ge–(S,Se) glasses
Y. Wang, M. Nakamura, O. Matsuda and K. Murase 872

Section 17. Electronic structure, transport and optical properties

Excitation of rare earth emission in chalcogenide glasses by broadband Urbach edge absorption (Invited paper)
S.G. Bishop, D.A. Turnbull and B.G. Aitken 876
Experimental evidence for long-range potential fluctuations in a-Se films
E.V. Emelianova, H.-Z. Song, V.I. Arkhipov and G.J. Adriaenssens 884
Sub-gap excitation effects in As_2S_3 glass
K. Tanaka 889
Dynamics of band tail holes in amorphous As_2Se_3: direct measurement of hopping relaxation time
T. Ohno and K. Shimakawa 894
The electronic structure of Cu-modified arsenic chalcogenides
G.J. Adriaenssens, A. Gheorghiu-de La Rocque, E. Belin-Ferré and P. Hertogen 898
Effect of thermal annealing on dynamics of photoluminescence in a-$GeSe_2$ films
Y. Wang, T. Komamine, T. Nakaoka, O. Matsuda, K. Inoue and K. Murase 904
Temperature dependence of photoluminescence intensity and decay in $GeSe_2$ glass
O. Matsuda, K. Yamagata, Y. Saitoh, Y. Wang, K. Inoue and K. Murase 908
Fabrication of photonic band gap structures in $As_{40}S_{60}$ by focused ion beam milling
G. Dale, R.M. Langford, P.J.S. Ewen and C.M. Reeves 913

Section 18. Photostructural changes

In situ measurements of photo-induced volume changes in amorphous chalcogenide films
A. Ganjoo, Y. Ikeda and K. Shimakawa 919
Raman study of ion irradiated GeSe films
P.K. Dwivedi, S.K. Tripathi, A. Pradhan, V.N. Kulkarni and S.C. Agarwal 924

Photodarkening in glassy As_2S_3
P. Hari, T. Su, P.C. Taylor, P.L. Kuhns, W.G. Moulton and N.S. Sullivan 929
Annealing time and temperature dependence for photo-induced crystallization in amorphous $GeSe_2$
K. Sakai, T. Uemoto, H. Yokoyama, A. Fukuyama, K. Yoshino, T. Ikari and K. Maeda 933
Anisotropic structural change induced by sub-bandgap lights in As–S glasses studied by low-frequency Raman scattering
K. Matsuishi, R. Arima, K.-i. Kagota and S. Onari 938
Photoinduced anisotropy in the ion-conducting amorphous semiconductor Ag–As–S
T. Gotoh, H. Hayakawa and K. Tanaka 944
Influence of temperature, light intensity and electrical field on the photoinduced dichroism in chalcogenide thin films
P. Hertogen and G.J. Adriaenssens 948
A model of photoinduced anisotropy in chalcogenide glasses
E.V. Emelianova, P. Hertogen, V.I. Arkhipov and G.J. Adriaenssens 954

Section 19. Chalcogenides: applications

Is there avalanche multiplication in amorphous semiconductors?
V.I. Arkhipov and S.O. Kasap 959
Structure and imaging properties of $As_{40}S_{60-x}Se_x$ glasses
M. Vlček, A.V. Stronski, A. Sklenař, T. Wagner and S.O. Kasap 964
Si–Te acousto-optic modulator for the 1.7–10.6 μm IR region
L.A. Kulakova, B.A. Matveev and B.T. Melekh 969
Application of $As_{40}S_{60-x}Se_x$ layers for high-efficiency grating production
A.V. Stronski, M. Vlček, A. Sklenar, P.E. Shepeljavi, S.A. Kostyukevich and T. Wagner 973
Photo-induced dissolution effect in $Ag/As_{33}S_{67}$ multilayer structures and its potential application
T. Wagner and P.J.S. Ewen 979
Copper-doped vacuum evaporated chalcogenide layers as sensitive ion-selective membranes
R. Tomova, G. Spasov, R. Stoycheva-Topalova and A. Buroff 985

Section 20. Amorphous organic semiconductors

Luminescence in plasma polysilylenes prepared from organosilanes
P. Horvath, F. Schauer, O. Salyk, I. Kuritka, S. Nespurek, J. Zemek and V. Fidler 989
A comparative study of photoconductivity and carrier transport in oligomeric films
S. Reynolds, J.T. Shepherd, C. Main, J.M. Marshall and J.M. Maud 994
Organic phthalocyanine films with high mobilities for efficient field-effect transistor switches
F. Schauer, I. Zhivkov and S. Nespurek 999

Part III. Applications

Section 21. Designed nanostructures, interfaces and heterostructures

Fabrication of nanometer sized Si dot multilayers and their photoluminescence properties
Y. Hirano, F. Sato, N. Saito, M. Abe, S. Miyazaki and M. Hirose 1004
Formation of nano-crystalline Si by thermal annealing of SiO_x, SiC_x and SiO_yC_x amorphous alloys: model systems for advanced device processing
D.M. Wolfe and G. Lucovsky 1009
Three-dimensional ordered nano-crystalline Si made by pulsed laser interference crystallization of a-Si:H/a-SiN_x:H multilayers
X. Huang, L. Wang, J. Li, W. Li, M. Jiang, J. Xu and K. Chen 1015

Three-dimensional array of silicon nanoscale elements in artificial SiO_2 opal host
V.N. Bogomolov, N.A. Feoktistov, V.G. Golubev, J.L. Hutchison, D.A. Kurdyukov, A.B. Pevtsov, R. Schwarz, J. Sloan and L.M. Sorokin 1021
Crystallization and oxidation process of nc-Ge in a-SiO_2 matrix from a-Si:H/a-Ge:H multilayers
Z. He, J. Xu, W. Li, K. Chen and D. Feng 1025
A comparative study of the photoluminescence properties of a-SiO_x:H film and silicon nanocrystallites
I. Umezu, K. Yoshida, A. Sugimura, T. Inokuma, S. Hasegawa, Y. Wakayama, Y. Yamada and T. Yoshida 1029
Defects and transport in a-Si:H/c-Si heterojunctions
T. Unold, M. Rösch and G.H. Bauer 1033
Photoelectron spectroscopy studies of microcrystalline/amorphous silicon interfaces
E. Böhmer and H. Lüth 1038
Amorphous/porous heterojunction on thin microcrystalline silicon
A. Rubino, P. delli Veneri, V. La Ferrara, R. De Rosa and M. Tucci 1044
Study of a-Si:H emitters for efficient carrier injection in GaAs bipolar devices
F.G. Della Corte, T. Polichetti, A. Rubino and G. Cocorullo 1049
Investigation of durability of Cr-p^+a-Si:H–V film memory devices
J. Hu, A.J. Snell, J. Hajto, M.J. Rose and W. Edmiston 1054
DC and ac measurements on metal/a-Si:H/metal room temperature quantised resistance devices
J. Hajto, J. Hu, A.J. Snell, K. Turvey and M. Rose 1058
a-SiN:H multilayer versus bulk structure: a real improvement of radiative efficiency?
R. Rizzoli, C. Summonte, P. Rava, G. Barucca, A. Desalvo and F. Giorgis 1062
Luminescence and absorption edge of a-Ge:H well layers in a-Si:H/a-Ge:H multilayers
H. Nakata, K. Murayama, S. Miyazaki and M. Hirose 1067
Thermalization gap of a-Si:H well layer in a-Si:H/a-Si_3N_4:H multilayers
K. Murayama, N. Katagiri, K. Ouno, H. Nakata, S. Miyazaki and M. Hirose 1072
Defect band distributions in hydrogenated tetrahedral amorphous carbon/crystalline silicon heterostructures
K.C. Palinginis, J.D. Cohen, A. Ilie, N.M.J. Conway and W.I. Milne 1077

Section 22. Solar cells

Thin film Si solar cell fabricated at low temperature (Invited paper)
K. Yamamoto, M. Yoshimi, Y. Tawada, Y. Okamoto and A. Nakajima 1082
Microstructure and photovoltaic properties of low temperature polycrystalline silicon solar cells fabricated by VHF-GD CVD using fluorinated gas
K. Ro, K. Nakahata, T. Kamiya, C.M. Fortmann and I. Shimizu 1088
Improvement of a-Si:H device stability and performances by proper design of the interfaces
R. Martins, I. Ferreira, A. Cabrita and E. Fortunato 1094
Hydrogenated microcrystalline silicon: how to correlate layer properties and solar cell performance
N. Wyrsch, L. Feitknecht, C. Droz, P. Torres, A. Shah, A. Poruba and M. Vaněček 1099
Investigation of the optoelectronic properties of μc-Si:H pin solar cells
H. Stiebig, T. Brammer, J. Zimmer, O. Vetterl and H. Wagner 1104
Spatially resolved photocurrent measurements of microstructured a-Si:H solar cells
C. Eisele, C.E. Nebel and M. Stutzmann 1109
Influence of electric field distortion and i-layer quality on the collection function of drift-driven a-Si:H solar cells
Ch. Hof, N. Wyrsch and A. Shah 1114

Electro- and photo-luminescence spectra from a-Si:H and a-SiGe p–i–n solar cells
G. Yue, X. Deng, G. Ganguly and D. Han 1119
Identification of transport and recombination paths in homo- and heterojunction silicon solar cells by electrically detected magnetic resonance
R. Müller, P. Kanschat, S. von Aichberger, K. Lips and W. Fuhs 1124
Effect of oxide treatment at the microcrystalline tunnel junction of a-Si:H/a-Si:H tandem cells
J.K. Rath, F.A. Rubinelli and R.E.I. Schropp 1129
Optimizing phosphorous and boron doped layers for stable p–i–n solar cells
Y. Poissant and P. Roca i Cabarrocas 1134
Approaches for large-area a-SiC:H photovoltaic-powered electrochromic window coatings
W. Gao, P. Liu, R.S. Crandall, S.-H. Lee, D.K. Benson and H.M. Branz 1140

Section 23. Photosensor arrays and optical devices

Imagers using amorphous silicon thin film on application specific integrated circuit technology
M. Böhm 1145
Requirements on amorphous semiconductors for medical X-ray detectors
M. Hoheisel and L. Bätz 1152
Multi-channel sensors with reduced metameric errors
D. Knipp, P.G. Herzog, H. Stiebig and F. König 1158
Properties of a-Se for use in flat panel X-ray image detectors
S.O. Kasap, C. Haugen, M. Nesdoly and J.A. Rowlands 1163
a-Si:H color imagers and colorimetry
P. Rieve, M. Sommer, M. Wagner, K. Seibel and M. Böhm 1168
Thin film detector for color recognition: an experimental and numerical study
J. Zimmer, D. Knipp, H. Stiebig and H. Wagner 1173
Transient properties of PINIP structures in three-terminal a-Si:H based three-color detectors
M. Topič, H. Stiebig, D. Knipp, F. Smole, J. Furlan and H. Wagner 1178
Optical modelling of a-Si:H-based three-terminal three-colour detectors
J. Krč, M. Topič and F. Smole 1183
Noise analysis of imagers with a-Si:H pin diode pixels
F. Blecher, B. Schneider, J. Sterzel, M. Hillebrand, S. Benthien and M. Böhm 1188
Noise model of a-Si:H IR photodetectors
D. Caputo, A. Nascetti and F. Palma 1193
Modeling of effects of material quality on fast characterization of state-of-the-art a-Si:H p^+–i–n^+ diodes
F. Lemmi 1198
Lateral conduction in structured amorphous silicon p^+–i–n^+ photodiodes
F. Lemmi, J.T. Rahn and R.A. Street 1203
Amorphous silicon photodetector for optical interconnections
R. Gaede, F. Li, D. Hyde and D. Shen 1208
New ultra-light flexible large area thin film position sensitive detector based on amorphous silicon
E. Fortunato, I. Ferreira, F. Giuliani, P. Wurmsdobler and R. Martins 1213
Amorphous silicon p–i–n on p crystalline silicon photodetector in the visible and near infrared spectrum
M. Tucci, R. De Rosa, F. Roca, D. Caputo and G. de Cesare 1218
A three-path model for visible/near infrared μc-Si:H p–i–n detectors
M. Vieira, A. Fantoni, M. Fernandes and R. Schwarz 1223

Image processing in a μc-Si:H p–i–n image transducer
F. Sousa, J. Martins, M. Fernandes, A. Maçarico, R. Schwarz and M. Vieira 1228
Novel electrochromic projection and writing device incorporating an amorphous silicon carbide photodiode
W. Gao, S.-H. Lee, D.K. Benson and H.M. Branz 1233
Optical link for digital transmissions using porous silicon light emitting diode
M. Balucani, G. Lamedica, G. de Cesare, D. Caputo and A. Ferrari 1238
Amorphous photocoupler consisting of a-SiC:H thin film light emitting diode and a-SiGe:H thin film photodiode
D. Kruangam, F. Wongwan, T. Chutarasok, K. Chirakawikul and S. Panyakeow 1241
Fast infrared light modulation in a-Si:H micro-devices for fiber-to-the-home applications
G. Cocorullo, F.G. Della Corte, R. De Rosa, I. Rendina, A. Rubino and E. Terzini 1247

Section 24. Transistors and micromechanical devices

Pulsed laser crystallization and doping for thin film transistors
P. Mei, J.B. Boyce, J.P. Lu, J. Ho and R.T. Fulks 1252
Microcrystalline silicon with high electron field-effect mobility deposited at 230°C
M. Mulato, Y. Chen, S. Wagner and A.R. Zanatta 1260
Performance improvement of polycrystalline thin-film transistor by adopting a very thin amorphous silicon buffer
K.W. Kim, K.S. Cho and J. Jang 1265
Low temperature amorphous silicon channel material for polysilicon thin film transistors
R.T. Fulks, J. Ho, J.B. Boyce, G.A. Davis and V. Aebi 1270
p Channel thin film transistor and complementary metal–oxide–silicon inverter made of microcrystalline silicon directly deposited at 320°C
Y. Chen, K. Pangal, J.C. Sturm and S. Wagner 1274
Density of states in the channel material of low temperature polycrystalline silicon thin film transistors
K. Mourgues, A. Rahal, T. Mohammed-Brahim, M. Sarret, J.P. Kleider, C. Longeaud, A. Bachrouri and A. Romano-Rodriguez 1279
High-performance polysilicon thin film transistors on steel substrates
M. Wu, Y. Chen, K. Pangal, J.C. Sturm and S. Wagner 1284
Simple fabrication of offset-gated poly-Si TFTs by in situ fluorine passivation and excimer-laser doping
C.-H. Kim, S.-H. Jung, J.-S. Yoo and M.-K. Han 1289
The impact of self-aligned amorphous Si thin film transistors on imager array applications
J.P. Lu, P. Mei, J. Rahn, J. Ho, Y. Wang, J.B. Boyce and R.A. Street 1294
Low photo-leakage current amorphous silicon thin film transistor with a thin active layer
Y.J. Choi, B.C. Lim, I.K. Woo, J.I. Ryu and J. Jang 1299
Thin film transistors obtained by hot wire CVD
J. Puigdollers, A. Orpella, D. Dosev, C. Voz, D. Peiró, J. Pallarés, L.F. Marsal, J. Bertomeu, J. Andreu and R. Alcubilla 1304
High performance a-Si TFT with ITO/n^+ ohmic layer using a Ni-silicide
J.I. Ryu, Y.J. Choi, I.K. Woo, B.C. Lim and J. Jang 1310
Properties of hydrogenated amorphous silicon thin film transistors fabricated at 150°C
J.B. Choi, D.C. Yun, Y.I. Park and J.H. Kim 1315
a-Si:H thin film transistors after very high strain
H. Gleskova, S. Wagner and Z. Suo 1320

Thin film transistors on polyimide substrates
H. Kavak, C. Gruber, H. Shanks, A. Landin, A. Constant and S. Burns 1325
Materials optimization for thin film transistors fabricated at low temperature on plastic substrate
A. Sazonov, A. Nathan and D. Striakhilev 1329
Application of constraint theory to Si-dielectric interfaces in a-Si:H and poly-Si thin film transistors (TFTs)
G. Lucovsky and J.C. Phillips 1335
Thin film micromachined structures for large-area applications (Invited paper)
M. Boucinha, V. Chu and J.P. Conde 1340
Micro-Raman analysis of polysilicon membranes deposited on porous silicon channels
H. Talaat, S. Negm, H.E. Schaffer, G. Kaltsas and A.G. Nassiopoulou 1345
